

## **Bug report**

### **Restful Booker website**

#### **1. Issue with the error message/calendar when booking a room in the past on the Front page.**

##### **Description**

When the users clicks+holds+drags to select a date in the past, no error message is displayed on the "Settings" page.

##### **Info**

1. Navigate to the Shady Meadows B&B website.  
Input data:  
<https://automationintesting.online/>
2. Click on the "Book this room" button next to a room you wish to reserve.
3. Click+hold+drag to select a date in the past.

##### **Expected result:**

A message that the date cannot be booked in the past is displayed to the User.

There is no error in the Console.

##### **Actual result:**

The calendar shows a blue label across the selected dates with the following information:

- Number of night(s)
- Price in British Pounds

The user can enter the personal details in the Contact Form, and book a room in the past.

No error message is displayed.

#### **2. Console issue 400 when entering invalid price, while creating a new room, on the B&B Booking Management page**

##### **Description**

Error handling for invalid inputs.

When Admin, while creating a new room, enters invalid value either alphabetic or special character in the Price field.

##### **Info**

1. Navigate to the Shady Meadows B&B website.  
<https://automationintesting.online/#/admin>
2. Login using valid username and password  
Input data:

Username: admin

Password: password

3. On the B&B Booking Management page

In the fields enter:

Room # - 102

Type – leave by default - single

Accessible - leave by default - false

Price - enter invalid value, either alphabetic or special character

Room details - leave by default empty or check few details

Rooms	Report	Branding	B&B Booking Management				1 Front Page	Logout
Room #	Type	Accessible	Price	Room details				
101	single	true	100	TV, WiFi, Safe				×
102	Single	false	a	<input checked="" type="checkbox"/> WiFi	<input type="checkbox"/> TV	<input type="checkbox"/> Radio	Create	
				<input checked="" type="checkbox"/> Refreshments	<input type="checkbox"/> Safe	<input type="checkbox"/> Views		

4. Click on the Create button

**Expected result:**

A message that that only numeric values are valid, similar like on when the Room # is empty

	Single	false	100	<input type="checkbox"/> WiFi	<input type="checkbox"/> TV	<input type="checkbox"/> Radio	Create
				<input type="checkbox"/> Refreshments	<input type="checkbox"/> Safe	<input type="checkbox"/> Views	

Room name must be set

There is no error in the Console.

**Actual result:**

Once the user clicks on the Create button, the page is blank.

The Console shows Error 400 indicating that the server cannot process the request due to a client error
